

CHARTMETER™ 5000

THE FIRST FLOWMETER WITH A
BUILT-IN CHART RECORDER

THE CHARTMETER™

A SINGLE NEMA 4, 4X UNIT INCORPORATING A CHART RECORDER, FLOWMETER & DATALOGGER

NEMA 4, 4X

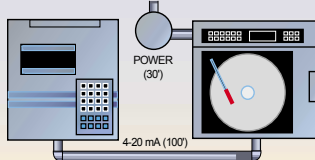

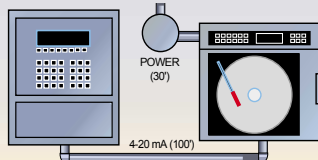

Eastech design engineers have successfully combined three separate products; a chart recorder, transit-time flowmeter and 8 channel datalogger into a single unit. Engineering and plant personnel may now specify an extremely accurate and cost efficient system to monitor and measure flow in one compact integrated assembly.

The First of its Kind

The Chartmeter 5000 is the first of its kind to be recognized as a single Nema 4, 4X assembly that combines high accuracy flow measurement with onboard chart monitoring of either open channel or closed pipe flow. The Chartmeter 5000 employs IEEE754 single floating point precision in all of its computations. An error of less than 0.0000005% is introduced during any level to flow conversion.

By combining accuracy and reliability with efficient design, the high initial cost of independent junction housings, mandatory wiring and field labor is totally eliminated.

COMPARATIVE COST ANALYSIS (100 ft. run)

OPEN CHANNEL FLOW		CLOSED PIPE FLOW	
			
CONVENTIONAL METHOD	CHARTMETER™	CONVENTIONAL METHOD	CHARTMETER™
FLOWMETER W/ DATALOGGER ¹	\$1849	TRANSIT-TIME FLOWMETER W/ DATALOGGER ³	\$5483
CHART RECORDER ²	\$1572	CHART RECORDER ²	\$1572
INSTALL RECORDER	\$100	INSTALL RECORDER	\$100
130' - 3/4" CONDUIT	\$210	130' - 3/4" CONDUIT	\$210
30' - 3 COND. WIRE	\$5	30' - 3 COND. WIRE	\$5
100' - 2 COND. CABLE	\$185	100' - 2 COND. CABLE	\$185
LABOR (ELECTRICAL)	\$1150	LABOR (ELECTRICAL)	\$1150
TOTAL COST	\$5071	TOTAL COST	\$8705
TOTAL COST SAVINGS: \$2,471.00		TOTAL COST SAVINGS: \$3,805.00	

¹ Meter cost based on Milltronics® list price. ² Recorder cost based on Chessel® list price. ³ Meter cost based on Panametrics® list price. * Not Required

EASTECH COMBINES THREE PRODUCTS INTO ONE COST-EFFECTIVE UNIT THAT ELIMINATES CONDUIT RUNS, WIRING, AND INSTALLATION COSTS

CHART RECORDER

A fully integrated 1, 7, or 31 day continuous trace circular chart recorder housed in a corrosion and impact resistant Nema 4, 4X enclosure.

OPEN CHANNEL ULTRASONIC FLOWMETER WITH DATALOGGER

The 5022 is a highly advanced microprocessor-based ultrasonic flow transmitter for extremely accurate measurement of flow in open channels. Since a 10% error in level measurement can result in a 25% error in flow measurement, the high accuracy (0.02") of the Model 5022, especially when utilized for billing purposes, directly translates into dollars.

CHART RECORDER

A fully integrated 1, 7, or 31 day continuous trace circular chart recorder housed in a corrosion and impact resistant Nema 4, 4X enclosure.

CLOSED PIPE TRANSIT-TIME FLOWMETER WITH DATALOGGER

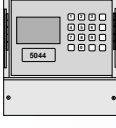

The Model 5044 transit-time flowmeter offers plant operating personnel a highly reliable instrument ($\pm 0.5\%$ of actual rate of flow) that is nonintrusive in design. Simple to install, with a one-piece Speedrail™ sensor mounting system and factory pre-programmed for ease of start-up, the 5044 Chartmeter will consistently maintain accurate readings over changing process conditions and time.
